

SMART CITY CASE STUDY

Collaboration and Security, Designed as One

An integrated boardroom, shared-space and facility-security environment for a modern enterprise site.

SECTOR	ENGAGEMENT
Corporate Workplace	Design, integration, commissioning

THE OPPORTUNITY

An enterprise facility required a seamless executive collaboration experience while strengthening site security and access management through a unified technology approach.

WHAT NEEDED TO CHANGE

- Deliver premium, low-friction collaboration in the boardroom.
- Turn a shared area into an engaging communication space.
- Improve visibility, controlled access and facility protection.

THE INTEGRATED SOLUTION

- Boardroom AV with intelligent camera tracking, professional audio, display technologies and simple control.
- Shared-area audio and video-wall capabilities for presentations and internal communications.
- CCTV, access control, integration, programming, testing, commissioning and user training.

OUTCOME

The finished environment brings collaboration, communication and security together in a reliable, scalable platform that supports everyday meetings and evolving facility requirements.
