

SMART CITY CASE STUDY

A Consistent Meeting Experience at Scale

Standardized audio-visual systems for 34 meeting rooms across a modern workplace.

SECTOR	ENGAGEMENT
Technology Enterprise	Design, integration, commissioning

THE OPPORTUNITY

A technology-focused enterprise needed a reliable, intuitive collaboration experience across 34 meeting rooms, with consistent room technology and straightforward daily operation.

WHAT NEEDED TO CHANGE

- Create a repeatable room standard across multiple meeting spaces.
- Make systems easy to use while maintaining professional performance.
- Deliver an approach that can grow with workplace needs.

THE INTEGRATED SOLUTION

- Professional conferencing systems, high-definition displays and centralized room control.
- System integration, programming, cable management, user-interface configuration and functional testing.
- Commissioning and end-user training to support consistent adoption.

OUTCOME

The workplace now operates with a standardized, user-friendly meeting-room experience that supports efficient communication and a scalable collaboration roadmap.
