

SMART CITY CASE STUDY

A Unified Workplace Collaboration Platform

Standardized audio-visual and operational monitoring across a multi-floor enterprise campus.

SECTOR	ENGAGEMENT
Financial Services	Design, integration, commissioning

THE OPPORTUNITY

A leading financial-services organization needed a consistent collaboration experience across a large corporate campus, alongside a modern operations environment for real-time monitoring and decision-making.

WHAT NEEDED TO CHANGE

- Create a reliable meeting-room experience across 52 floors.
- Unify room technologies while keeping the experience simple for end users.
- Establish a centralized operations environment with high-impact visualization.

THE INTEGRATED SOLUTION

- Standardized meeting-room AV systems with professional displays, conferencing and intuitive control.
- A network operations center with advanced visualization and monitoring capabilities.
- Integrated design, supply, installation, configuration, testing and commissioning.

OUTCOME

The resulting platform provides a scalable foundation for workplace collaboration and operational visibility, helping teams work consistently across the campus while supporting long-term digital transformation.
